

Dear Sirs:

In this age of mega corporations that seem to control the media, print, television and radio, it is refreshing to tun into XM Satellite radio and hear what I want to hear.

XM Satellite Radio provides more variety and quality of broadcasts that are sadly lacking in commercial radio. I am able to listen to music that cannot be found on the commercial FM bands.

Since I pay for this service it should not be left up to the National Association of Broadcasters to tell me what I can or cannot listen to on XM Satellite radio. Please listen to the people and not the corporations and reject NAB's petition 04-160.

Thank you for your time and attention.
